**DESCRIPTORS:** \*Machines, \*Paper, \*Fatigue  
(Mechanics), Stresses.

A technique is described for recording and analyzing  
periodic as well as transient speed disturbances on  
paper machines. Details are given of a number of  
tests which illustrate this technique, which involves  
determination of the values for the transfer function  
and calculation of the draw/frequency curve for an  
applied disturbance. (Author)
